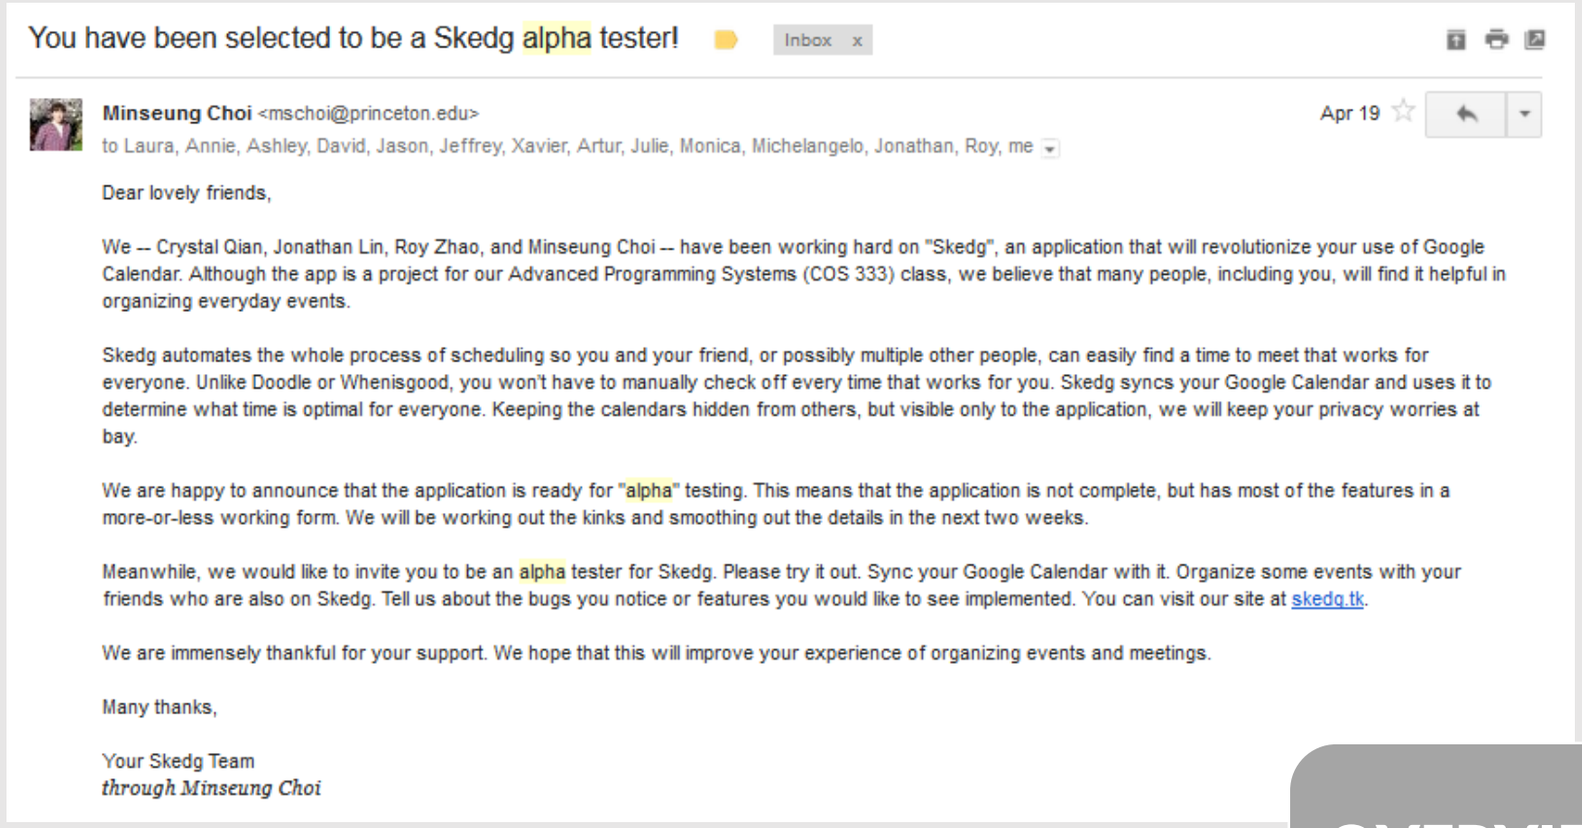
ALPHA TEST



You have been selected to be a Skedg alpha tester! Inbox x

Minseung Choi <mschoi@princeton.edu> Apr 19

to Laura, Annie, Ashley, David, Jason, Jeffrey, Xavier, Artur, Julie, Monica, Michelangelo, Jonathan, Roy, me

Dear lovely friends,

We -- Crystal Qian, Jonathan Lin, Roy Zhao, and Minseung Choi -- have been working hard on "Skedg", an application that will revolutionize your use of Google Calendar. Although the app is a project for our Advanced Programming Systems (COS 333) class, we believe that many people, including you, will find it helpful in organizing everyday events.

Skedg automates the whole process of scheduling so you and your friend, or possibly multiple other people, can easily find a time to meet that works for everyone. Unlike Doodle or Whenisgood, you won't have to manually check off every time that works for you. Skedg syncs your Google Calendar and uses it to determine what time is optimal for everyone. Keeping the calendars hidden from others, but visible only to the application, we will keep your privacy worries at bay.

We are happy to announce that the application is ready for "alpha" testing. This means that the application is not complete, but has most of the features in a more-or-less working form. We will be working out the kinks and smoothing out the details in the next two weeks.

Meanwhile, we would like to invite you to be an alpha tester for Skedg. Please try it out. Sync your Google Calendar with it. Organize some events with your friends who are also on Skedg. Tell us about the bugs you notice or features you would like to see implemented. You can visit our site at skedg.tk.

We are immensely thankful for your support. We hope that this will improve your experience of organizing events and meetings.

Many thanks,

Your Skedg Team
through Minseung Choi
